Hotspots data

Offenders under probation supervision in settled and suitable accommodation at the end of their licence or order

Year of data: 2006/07

Notes: The data below shows the number and percentage performance for local authorities with regard to the indicator for offenders under probation supervision in settled and suitable accommodation at the end of their order or licence. It includes a traffic light rating for each local authority based on quartiles of performance (green, amber-green, red-amber and red). Local authorities with a total of 15 or fewer clients have not been rated according to the traffic light system (i.e., they appear in white).

Instructions: Use the filter keys to manage, select and sort the data.

| Region | Local Authority | % of offenders in settled and suitable accommodation | Total number of offenders | Number in settled and suitable accommodation | Number <u>not</u> in settled and suitable accommodation | Traffic light rating |

Hotspots data

Care leavers at age 19 in suitable accommodation

Year of data: 2006/07

Notes: The data below shows the number and percentage performance for local authorities with regard to the indicator for care leavers at age 19 in suitable accommodation. It includes a traffic light rating for each local authority based on quartiles of performance (green, amber-green, red-amber and red). Local authorities with a total of 15 or fewer clients have not been rated according to the traffic light system (i.e., they appear in white).

Instructions: Use the filter keys to manage, select and sort the data.

Care leavers at age 19 in education, employment or training

Year of data: 2006/07

Notes: The data below shows the number and percentage performance for local authorities with regard to the indicator for care leavers at age 19 in education, employment or training. It includes a traffic light rating for each local authority based on quartiles of performance (green, amber-green, red-amber and red). Local authorities with a total of 15 or fewer clients have not been rated according to the traffic light system (i.e., they appear in white).

Instructions: Use the filter keys to manage, select and sort the data.

Hotspots data

Learning disabled clients in settled accommodation (proxy data)

Year of data: 2005/06

Notes: The data below shows the number and percentage performance for local authorities with regard to the proxy indicator for learning disabled clients in settled accommodation. It includes a traffic light rating for each local authority based on quartiles of performance (green, amber-green, red-amber and red). Local authorities with a total of 15 or fewer clients have not been rated according to the traffic light system (i.e., they appear in white). The settled accommodation proxy data reported here refers to those learning disabled clients who are living in the community and receiving services.

Instructions: Use the filter keys to manage, select and sort the data.

| Region | Local Authority | % learning disabled clients in settled accommodation | Total number of learning disabled clients | Number in settled accommodation | Number <u>not</u> in settled accommodation | Traffic light rating |

Hotspots data

Learning disabled clients in employment (proxy data)

Year of data: 2005/06

Notes: The data below shows the number and percentage performance for local authorities with regard to the proxy indicator for learning disabled clients in employment. It includes a traffic light rating for each local authority based on quartiles of performance (green, amber-green, red-amber and red). Local authorities with a total of 15 or fewer clients have not been rated according to the traffic light system (i.e., they appear in white).

Instructions: Use the filter keys to manage, select and sort the data.

Socially excluded adults Public Service Agreement (PSA)

Hotspots data

Adults receiving secondary mental health services in employment (proxy data)

Year of data: 2006/07

Notes: The data below shows the percentage performance for local authorities with regard to the proxy indicator for adults receiving secondary mental health services in employment. It includes a traffic light rating for each local authority based on quartiles of performance (green, amber-green, red-amber and red). As the data has been sourced from a sample of users of community mental health services, rather than based on administrative data as per the other groups, the client numbers are not shown. Local authorities where a total of 15 or fewer clients were sampled in the survey have not been rated according to the traffic light system (i.e., they appear in white).

Instructions: Use the filter keys to manage, select and sort the data.

| Region | Local Authority | % mentally ill in employment | Traffic light rating |
